

Engineering – CAD Conversion Services

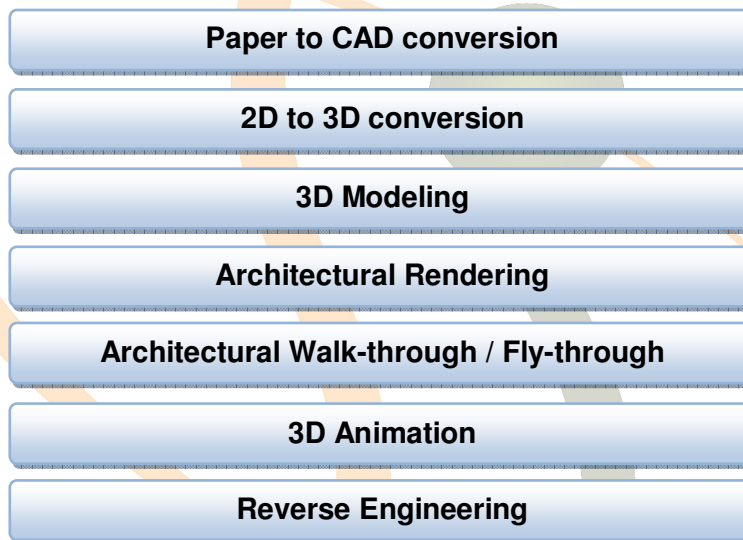

Corporate Profile & Business Model

www.sonitek.ca

Sonitek is a strategic partner for Canadian companies looking to outsource their architecture and engineering process.

Through its established Canadian presence, and its presence in India, Sonitek emerges in the marketplace with a differentiated offer that provides Canadian Architectural and Engineering Clients the “peace of mind” and “trust” that their outsourced process is in good hands.

Sonitek’s business model is to enhance relationships between Sonitek’s delivery team and the Client. Sonitek is fully committed to reduce its Clients’ operating costs by blending Canadian and Indian costs while maintaining maximum performance and value in the areas of conversion services:

Sonitek’s Project Manager in Canada will interface with the Client and Sonitek’s delivery center to ensure that the Client’s interests are well represented. Sonitek’s Project Manager will demonstrate his experience in design and implementation of outsourced processes, and capitalize internal resources to support the Client.
